BRIDGING PARTNERSHIPS. BUILDING COMMUNITIES.

Sponsor: TBC

The energy revolution will require unprecedented investment in infrastructure and a holistic approach to delivery so critical assets are in place on time to meet the immense challenges for Europe's security, environment and economy.

The most immediate and critical assets that require investment for the energy transition to succeed is what connects the supply of clean energy with the insatiable demand, the transmission grid and ports.

The Power & Energy Conference will bring together the public and private sector leaders who will design, build, finance, maintain, and operate the infrastructure Europe needs for a just energy transition, and to keep the lights on.

This conference is to provide an impactful discussion to power the conversation on energy from theory to implementation and find answers to trillion-euro questions.

The Key Themes are:

- The future of power in Europe in 2030 and 2050.
- International best practice in the delivery of onshore and offshore transmission infrastructure.
- How will the supergrid be delivered?
- The role of microgrids.
- What do renewable energy developers need?
- What does the energy transition and alternative fuels mean for ports and shipping?
- How can public and private capital be blended to power the energy transition?
- What is hydrogen-compatible infrastructure and where is it needed?
- The role of data in the energy transition.
- How will industry & business connect to clean energy?
- The role of nuclear power.
- Ireland's leadership role in exporting renewable energy to Europe and climate tech around the world.
- What is the condition of Ireland's grid and transmission network and what needs done to be fit for purpose?
- What is Ireland's hydrogen strategy?

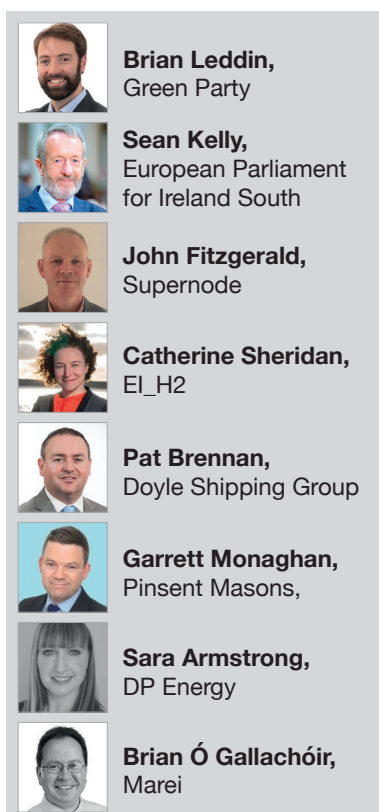

Who Should attend?

- Senior management from local and central government sectors such as energy, transport, planning, urban development, climate, infrastructure, ICT, finance and sustainability.
- Relevant policy-makers and advisors in national and local government.
- Engineers, technicians, communications professionals, business developers.
- Ecologists, planners and project managers.
- CEOs, CFOs, CTOs and other senior IT executives from the energy industry.
- Senior decision-makers in the energy, technology, sustainability and ESG sectors.
- Academics and researchers.
- Economic and management consultants.
- Financiers and investors.
- Legal professionals.
- Recruitment companies.
- Senior management (CEO, CFO) – those making key strategic & financial decisions.
- Energy Performance Officers at Departmental level and nominated by public bodies.
- Energy managers or those responsible for energy management in public bodies.
- Key members of energy project teams within public bodies e.g. fleet managers, procurement managers, finance managers, project managers etc.
- Those responsible for annual Monitoring and Reporting (M&R) of energy performance.
- Those interested in energy management or carbon reduction opportunities within public bodies.

Organisations Attending:

Packages Available:

An exhibition will run alongside the conference providing you with the opportunity to network with the delegates, demonstrate your products, generate new sales leads and raise your profile within the renewable energy and national grid community. The exhibition package includes the listing of your logo and company name, short description and link on the conference website and program booklet.

The following options are available:

HEADLINE SPONSOR

- Corporate branding on website, newsletters, social media, internal event graphics, stage graphics and dining area.
 - Keynote speaking slot
 - Access to registration list
 - 3 complimentary event tickets
 - Thank you email post event
- €7,995

EXHIBITION

- Table top (3 Meters) including one power socket, two chairs, tablecloth
 - Listing on website & event brochure
 - 1 complimentary ticket
- €2,995
